## BioTouch UK

# Permanent Make Up Training THE GUILD ACCREDITATION

- BioTouch UK Instructors are rigorously trained in USA and Europe in all phases of Permanent Makeup technology. Programmes are updated to keep pace with the latest technique and procedures, ensuring our students the best education possible. This is to guarantee confidence and satisfaction that you are learning from the best!
- Our courses are fully Accredited by the Guild of Beauty Therapist so be assured that you are training with the best. A student who completes the training course can apply for full Guild memberships. (This include insurance cover for £2 million of treatment and public and product liability cover
- We hold training courses on date's to suit throughout the year. Classes are kept to minimum 1 or 2 students.
- BioTouch micro pigments are iron oxides and carbon base. Carbon is found in the natural makeup of the human body. Since these pigments are made up of very small molecules they will absorb into the skin more effectively and result in less fading and a truer colour than organic pigments. The ingredients are regulated by the US federal government to keep them safe for public use.
- Our pigments are sterilised by gamma irradiation (many times more powerful than x-rays) to maintain hygienic standard throughout their shelf life.

We pride ourselves on being friendly and flexible and welcome the opportunity of meeting with you shortly.

If you would like further information please call us on the above number or via email.

## **The Training Course:**

**The course is three days intensive training.**

### **The first day**

Consist of power point presentations lecture on the background and theory of permanent make up.

We will also cover Hygiene, Health and safety, prevention of infection and diseases. Blood Bourne infections, Disinfection and Sterilization, Anatomy & Physiology of skin and how the skin heals and repairs itself.

### **The Second day**

Consists of colour theory, skin tone, identifying cool and warm skin undertones Equipment and needles, Techniques for creating shapes for Eyeliner, eyebrows and lip liner. Marketing your business, planning and pricing. Hands on practical on student supplied models.

YOU WILL REQUIRE A MODEL

### **The Third day**

Consists of Hands on practical re-cap and evaluation of learning.

After training modules are completed the student will be required to complete 6 case studies with demonstration of techniques on a model for a review and tests of acquired knowledge and understanding.

**Upon successful completion of case studies & knowledge tests the student trainee will receive their Diploma and can proceed to practice professionally !**
